PROGETTO ERASMUS+ KA2

"Developing European Values in Primary School"

ANNO SCOLASTICO 2018/19

Report activities organized for the Erasmus+ KA2 project

The activities organized and developed for Erasmus+ KA2 project aimed at the realization of a performance by the students of 3-4-5 classes of Primary School.

We created the performance, using music, dance, art, history and many other curriculum subjects.

After a period of study of the text "Lisistrata" by Aristofane, the performance, titled "Through Mediterranean Sea" is been realized with two groups of students (foreign origin and culture of origin) and four teachers trainers.

The aims were to educate at the legality through classic culture, to integrate foreign students and enrich the knowledge of the students on the historical, cultural origins of our land.

The performance tells about the war. The students simulated the sounds of the war by their body, with quick and slow walks. The repeated drum sounds meant bombing.

In the performance, the choirs were used to remember the importance of the voice of the people in the Greece tragedy, but even to remember that the union of the voices can give the force to people to tell no at the war.

During the lessons, one of the most significant activity was when the students were asked what they would have given to avoid the war. Every student gave his personal opinion
